

Tech Lead / Engineering Manager hands-on

Tech Lead / Engineering Manager hands-on fullstack. 15+ years in **Angular**, **TypeScript** **strict** and **NestJS**.

I have built and grown development teams. I have modernised critical legacy platforms while preserving delivery. Sectors: media, real estate, agriculture, telecoms, defence, enterprise software. Notably at Canal+, Joorney, Kaliz, LiveAction and BlueWhale.

Recent work: a legacy ERP modernised, ~50% faster display, reduced frontend debt. And a team grown from 3 to 7, with an industrialised delivery.

I support teams on:

- Architecture and technical choices
- Progressive modernisation of legacy applications
- Quality and delivery (testing, **CI/CD**)
- Product / engineering collaboration
- Mentoring and upskilling

My approach: technical leadership and hands-on involvement in the code. Pragmatic agile methods, adapted to the product, the team and the context.

I use AI (**Claude Code**, **GitHub Copilot**) as an engineering assistant. I keep ownership of technical decisions.

I enjoy demanding environments, committed to quality, delivery and collective progress.

PROFESSIONAL EXPERIENCE

BlueWhale

Apr 2025 — Apr 2026

Tech Lead

Angular · TypeScript strict · Technical Leadership · Code Review · Legacy Modernization

Blue Whale is France's leading apple exporter (founded in 1950, close to 300 growers, ~€300M revenue). Its operations rely on a central agricultural ERP.

Tech Lead on this ERP, used by around fifty people. Complex legacy context: **Angular**, **Java/Spring 2**, **23 PowerBuilder** applications, Oracle 9 and ageing infrastructure.

Leadership & team

- Led a team of 3 senior fullstack developers: sprints, requirement clarification and technical trade-offs.

- Owned technical decisions, coached the team on best practices and ran structured code reviews.
- Collaborated with product on estimates, prioritisation and release scoping.

Modernisation & architecture

- Modernised the frontend: migrated **Angular** 15 → 21 and updated **DevExtreme**. Prepared a migration to **Angular Material** (with guardrails).
- Introduced **NgRx** to structure state management and make complex application flows more reliable.

Quality & delivery

- Strengthened code quality: **TypeScript strict**, strict **ESLint**, Prettier, Stylelint and shared conventions.
- Standardised with **Nx** (schematics) to ease migrations, align practices and prepare future modular **Angular/NestJS** applications.
- Modernised the legacy incrementally, without service interruption: resolved code/CI-CD blockers and reduced debt.
- **Results:** display speed up by around 50% across all screens, after UX/UI optimisation; better user and developer experience, reduced frontend debt.

*Environment : **Angular**, **Angular Material**, **DevExtreme**, **TypeScript**, **RxJS**, **NgRx**, **NX**, **Java**, **PowerBuilder**, **Node.js** scripts, **Git (Bitbucket)**, **Docker**, **ESLint**, **Prettier**, **Stylelint**, **GNU/Linux**, **Windows Server 2003**, **Oracle 9**, **PostgreSQL**, **Tomcat***

Joorney

Jan 2023 — Aug 2024

Engineering Manager hands-on

Engineering Management Technical Leadership Software Architecture Delivery Management

Full-Stack Development

Joorney is a US company producing business plans for immigration cases (EB-5, E-2, L-1 visas). It produces around 300 business plans a month, across more than 120 industries.

Engineering Manager hands-on, owning the full application scope. Internal ecosystem used by around a hundred staff. Stack: **Angular**, **NestJS**, **Nx**, **PHP**, **Node.js**, **Python** and **AWS**.

Team & management

- **Structured and grew an international team** from 3 to 7 developers (5 hires), split into 2 squads (fullstack and **Python/Data**).

- Recruiting, onboarding, one-on-ones and upskilling support.
- **Cross-cultural, async management:** time zones, cultural differences, agile rituals and follow-up.

Architecture & industrialisation

- Designed the architecture of an ecosystem grown from 1 legacy application to 6 dedicated business applications.
- Shipped a first financial application. Then industrialised writing tools, replacing manual workflows and legacy tools.
- Integrated **Python AI modules** (proofreading, correction, inconsistency detection) and sync tools for Microsoft, Google, HubSpot and Wrike.

Modernisation & delivery

- Owned technical decisions hands-on: POC, architecture choices and API integrations.
- Led the **Symfony/PHP** → **Nx/NestJS** migration, keeping the still-useful legacy engine.
- Standardised practices (**Nx**, schematics, **TypeScript strict**, **ESLint**, conventions) to align the codebase, ease onboarding and make future changes safer.
- Owned **CI/CD**, deployments and the **Bitbucket** → **GitHub** migration; introduced **GitHub Copilot**.
- Drove **Product / Data / Tech** trade-offs with the CPO; settled the company-wide collaboration-suite choice (**Microsoft vs Google**).
- **Results:** from a single isolated legacy application to a **structured ecosystem of 6 business applications**. Smoother writing experience, fewer production errors.

*Environment : **Angular**, **NestJS**, NodeJS, **TypeScript strict**, **RxJS**, **NgRx**, **Nx**, **PHP**, **Symfony**, **Python**, **Git** (**Bitbucket** / **GitHub**), **Jira**, **Notion**, **Docker**, **AWS**, **GitHub Copilot**, **GNU/Linux***

Kaliz

Apr 2021 — Jun 2023

Lead Dev Angular

Angular Technical Leadership Code Review Technical Debt Reduction CI/CD

Kaliz is a rental-management proptech. Founded late 2019, over €22M raised, several tens of thousands of units managed. Its operations rely on a central business application.

Lead Dev Angular on this critical application (CRM, leases, billing), used by around thirty staff.

Foundation: **Nx** monorepo, ~80,000 lines of **TypeScript**, 650+ components.

Technical leadership & quality

- Held **technical frontend responsibility** for 4 to 5 developers: code review, coaching, **Angular/RxJS** best practices and trade-offs.
- Defined the **frontend roadmap**: debt prioritisation, architecture decisions and structured code reviews.
- Ran agile rituals (Scrum Master) and worked closely with product.

Hands-on development

- Audited the code and progressively improved the frontend foundation, without service interruption.
- Developed structural topics: refactoring, complex components and business-driven updates.
- Rolled out **TypeScript strict**, strict **ESLint**, Prettier and development conventions.

Architecture & delivery

- Introduced **NgRx**: single source of truth, clarity on complex business logic, fewer backend calls.
- **Standardised via Nx and schematics**: more reliable recurring components and version upgrades.
- Secured delivery: **Swagger** API contracts, **GitLab CI/CD** and **Cypress / Playwright** end-to-end tests (lease creation, rental management).
- **Results**: fewer bugs, faster loading, better developer experience, significantly reduced debt.

*Environment : **Angular**, **TypeScript strict**, **RxJS**, **NgRx**, **Nx**, **HTML**, **CSS**, **Git (Gitlab)**, **Docker**, **Notion**, **Cypress / Playwright**, **Prettier**, **GNU/Linux***

Journey

Aug 2020

Fullstack PHP/Symfony Developer

PHP **Symfony** **Full-Stack Development** **Code Audit**

Journey is an international business-plan writing company for immigration cases. Present in the United States and France. At the time, the company was evolving its first internal business applications.

Fullstack PHP/Symfony Developer on a short engagement: ramped up rapidly on an existing application and delivered operational code improvements.

- Ramped up rapidly on an existing business application (**PHP/Symfony**).
- Audited existing code and identified technical improvement areas.
- Carried out targeted technical interventions on priority topics.

- Contributed to application maintainability in a short, operational engagement.

*Environment : **PHP**, **Symfony**, HTML, CSS, Git, Jira, GNU/Linux*

Scopea

Oct 2017 — Apr 2021

Fullstack Odoo consultant

Odoo Python Full-Stack Development

Scopea is a Toulouse-based cooperative, **Odoo** Gold partner. Specialises in the integration and custom development of **Odoo** for very small businesses and SMEs. Engagements regularly required adapting the **Odoo** standard to each client's processes.

Fullstack Odoo consultant for several very small businesses and SMEs, from requirement analysis to production. Worked fixed-price: improvements, business updates and complete modules.

- Gathered and analysed client requirements, defined the technical solution and estimated fixed-price effort.
- Developed custom business modules to adapt **Odoo** to processes not covered by the standard. Example: an industrial work-order tracking module.
- Handled QA, production delivery and follow-up, alone or in a pair.
- Ramped up rapidly on the **Odoo** ecosystem and **Python**, on an initially unfamiliar stack.

*Environment : **Odoo**, **Python**, HTML, CSS, **GitHub**, Docker, GNU/Linux*

LivingObjects

Sept 2019 — Mar 2020

Senior Angular Developer

Angular Code Review TypeScript strict Technical mentoring

LivingObjects is a Toulouse-based software vendor specialising in network analytics and monitoring for telecom operators. Its platform monitors millions of devices at Tier 1 operators. After divesting part of its activities to LiveAction (2017), the company kept developing several monitoring products.

Senior Angular Developer on an application integrated into a legacy foundation. Mission combining frontend development, module integration, code audit and team support.

- Integrated new **Angular** modules into a legacy **PHP** foundation, with consistency and maintainability — including unblocking a sensitive integration.

- Ran code audits and reviews, with improvement proposals on frontend topics.
- Mentored the team on **Angular** best practices, **TypeScript strict**, **ESLint** and conventions.
- **Results:** improved developer experience, fewer bugs and smoother onboarding.

Environment : **Angular**, **TypeScript strict**, **HTML**, **CSS**, **Git**, **Redmine**, **Docker**, **GNU/Linux**

867 / 2,000 characters

LiveAction

Oct 2017 — Mar 2019

Senior Angular developer

Angular **TypeScript strict** **RxJS** **Data Visualization** **PDF Generation**

LiveAction is a US software vendor (Palo Alto), founded in 2007, specialising in network performance analytics. Its product is used by more than 750 enterprises. Its Toulouse entity stems from the 2017 acquisition of LivingObjects' monitoring business.

Senior Angular developer on the structural migration of the application from **AngularJS** to **Angular**. Mission centred on rebuilding the frontend foundation, improving its maintainability and modernising practices.

- Made a **major contribution to the AngularJS → Angular 2 migration**: ~15 modules, ~50 pages and hundreds of components.
- Rolled out **TypeScript strict**, **ESLint** and **Angular/RxJS** best practices, with code reviews and team support.
- Built customisable dashboards with **Highcharts** and **D3.js** on data-rich interfaces; contributed to customisable PDF report modules.
- **Results:** faster loading, fewer bugs, better maintainability and a strong reduction in debt.

Environment : **Angular**, **AngularJS**, **TypeScript strict**, **HTML**, **CSS**, **Java**, **Git (Gitlab)**, **Trello**, **Jira**, **Docker**, **GNU/Linux**, **Nginx**

LivingObjects

Oct 2015 — Oct 2017

AngularJS developer

AngularJS **Data Visualization** **Highcharts**

Engagement carried out through Ausy, an international consulting and engineering group, at LivingObjects — a Toulouse-based software vendor specialising in network analytics and monitoring

for telecom operators. Its platform monitors millions of devices at Tier 1 operators.

AngularJS developer on interfaces with strong visualisation and performance constraints: dashboards and customisable reports.

- Developed and maintained an **AngularJS** application used by several hundred users.
- Built customisable dashboards, integrating Highcharts charts, tables and advanced configuration forms.
- **Owned** the schedulable PDF report design module, with consistent rendering across web display and export.
- Ramped up rapidly on **AngularJS**, frontend best practices and maintainable development principles in a demanding environment.

*Environment : **AngularJS**, **TypeScript**, HTML, CSS, Trello, Git (Gitlab), Redmine, Jira, GNU/Linux, Nginx*

Canal+

Jan 2012 — Sept 2015

Fullstack developer then technical lead

PHP MySQL High Availability Technical Coordination Release Management

The Canal+ Group is a major international audiovisual player (70+ countries, around 40 million subscribers). Engagement carried out through Omnilog, on set-top box and web interfaces.

Fullstack developer then technical lead on consumer-facing interfaces, in a critical, highly exposed production environment.

- Developed and maintained **PHP/Smarty**, JavaScript and MySQL interfaces across set-top boxes, ISP boxes, web and mobile.
- Operated at high volume under strict availability constraints: hundreds of thousands of simultaneous users, up to several million during major events.
- Built an **accessible, multi-language interface** adapted for deaf, hard-of-hearing and visually impaired users.
- Coordinated **Product / QA / Infrastructure**: testing, fixes, release notes and release orchestration.
- Supervised high-stakes releases across **~24 servers**: progressive deployments, monitoring, rollbacks and hotfixes.
- Led the **32 → 64-bit** server migration and the **SVN → Git** migration.

Environment : **PHP**, **Smarty**, HTML, CSS, JavaScript, MySQL, NoSQL, **AngularJS**, SVN, Git, Redmine, Trello, Jenkins, Jira, Confluence, Windows, GNU/Linux, Apache, Httpd, Nginx, Akamai, Amazon (**AWS**)

INRIA

May 2011 — Oct 2011

SOA / IoT research intern

Research SOA BPEL

Inria is the French national research institute for digital science and technology. Within the ADAM team: service-oriented architectures, distributed systems and the Internet of Things.

6-month research internship on *Bridging Software-Oriented Architecture with the Internet of Things*.

Modelled CBRN crisis procedures with a SOA/SCA approach, orchestrated interactions via BPEL.

- Carried out research, modelling and technical prototyping in several languages.
- Wrote a detailed internship report: state of the art, architecture, crisis processes and experimentation findings.

579 / 2,000 characters

EADS Cassidian

Jun 2010 — Oct 2010

Java/J2EE engineering intern

Java J2EE Technical Documentation

EADS, now Airbus, was one of the world's leading aerospace, space and defence groups. Cassidian, its defence division, used many internal tools for technical documentation.

Engineering internship: designed and developed a **Java**/J2EE web documentation platform.

Formalised its architecture and data model.

- Developed the application in **Java**/J2EE, HTML, CSS and jQuery.
- Produced the internship report, architecture diagrams, database diagrams and technical documentation.

Junior entreprise EISTI

2008

Web developer

PHP Web Development HTML/CSS

The EISTI Junior Enterprise (now CY Tech) gave students assignments for real client companies. Professional, delivery-oriented setting.

Delivered **first web projects** in **PHP**, HTML, CSS, JavaScript and jQuery, from requirements to client delivery.

- Built a website for a travel agency and a showcase site for a glazing company.
- Integrated web pages, adapted to requirements and delivered simple sites, in direct client contact.

429 / 2,000 characters

EDUCATION

- **2011** - Engineering degree in Mathematics and Computer Science, EISTI, Pau.
- **2009** - Bachelor's degree in Mathematics and Computer Science, University of Cergy-Pontoise, in partnership with EISTI.
- **2006** - Scientific Baccalaureate, engineering sciences option, mathematics specialisation, Lycée International de Colomiers.

PERSONAL PROJECTS & EXPERIMENTS

- Built a homelab with Proxmox, Terraform and Ansible.
- Volunteer frontend developer ([Vue.js](#)) for a slow-motion film editing application.
- Built a wedding website using React, [Firebase](#), Docker, [AWS](#) and [Node.js](#) scripts.

ADDITIONAL INFORMATION

- Professional English, TOEIC 780, experience in international teams.
