BlueWhale (Florian Lefevre Consulting)	Apr 2025 — Apr 2026
Tech Lead	
Angular · TypeScript strict · Technical Leadership · Code Review · Legacy Modernization	
- Managed 3 developers on a legacy agricultural ERP: owned technical decisions and trade-offs, and ran code reviews. - Improved perceived display speed by around 50% and reduced debt via incremental modernisation (Angular 15 → 21, CI/CD), without service interruption.	
Joorney (Florian Lefevre Consulting)	Jan 2023 — Aug 2024
Engineering Manager hands-on	
Engineering Management · Technical Leadership · Software Architecture · Delivery Management · Full-Stack Development	
- Managed an international team grown from 3 to 7 developers (2 squads), from hiring to delivery: upskilled and gave the team autonomy. - Architected an ecosystem grown from 1 legacy application to 6 applications for business plan generation (Angular, NestJS, PHP, Python AI modules); migrated Symfony → Nx/NestJS, built internal AI modules. - Industrialised previously manual business processes: turned a stalled MVP into a mature, well-controlled ecosystem.	
Kaliz (Florian Lefevre Consulting)	Apr 2021 — Jun 2023
Tech Lead Angular	
Angular · Technical Leadership · Code Review · Technical Debt Reduction · CI/CD	
- Held technical frontend responsibility for 4 to 5 developers on a critical real estate management application (Nx monorepo, ~80,000 lines of TypeScript, 650+ components). - Took ownership of a complex foundation: TypeScript strict, Nx/NgRx, code quality, CI/CD.	

- Reduced debt progressively, improved delivery reliability and strengthened code quality.
